authorized manufacturer

NEWS RELEASE – January 30th, 2007

**BOEHM INC INTRODUCES NEW “FLOWJET” INKS
FOR HOT MELT INK JET APPLICATIONS**

Boehm Inc, an ISO 9001:2000 certified company headquartered in Grove City, OH is pleased to announce that it has partnered with Coding Products, an *ITW* Company, to offer two (2) new product lines of Hot Melt Inks for Markem Ink Jet Coders.

Boehm with offices in Ohio & Kentucky can immediately supply solid ink replacement blocks for the Markem small character printers: 9064 / 9096 and 962. These supplies offer savings and improved performance over the current OEM consumable.

The second product line offered is a solid ink replacement canister for the Markem large character printers: 5000 series. Flowjet Inks, when paired with Markem’s complete range of ink jet coders, create an unbeatable combination of reliable operation with significantly improved print quality and performance.

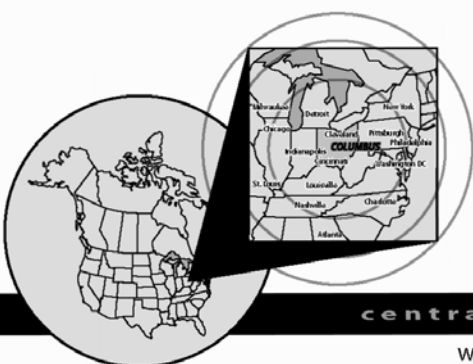

Coding Product’s Flowjet Ink product line will contribute significantly to your bottom line through lower cost, improved ink mileage, potentially less printer maintenance, improved adhesion / abrasive capabilities and improved print density.

Coding Products has been a leading manufacturer of Hot Stamping Foil, Thermal Transfer Ribbon and Hot Ink Rollers since 1977. As an industry-leading manufacturer of printing consumables, Coding Products selected Boehm Inc. based on its market leading reputation for delivering quality products & service to the marketplace.

Coding Products continues to build on quality and commitment for an ever-changing industry and according to Boehm’s Product Manager Michael Hutchison - “We have a combined 100+ years of ink jet sales & service experience at Boehm. Inc. and selected Flowjet® Inks based on their superior features.”
